Subject index

Adenyly cyclase activation
male hamster olfactory receptor neurons—female pheromones components 725
After taste studies
taste stimuli, humans 271
Anthonomous grandis
receptor neurons, pheromones/host plant odors 311
Aphrodisin
pheromone/transducer 199

Beidlers mixture equation
psychophysical investigation—molal concentrations 659
Binasal olfaction
left/right nostril 233

Caffeine
interactions—sucrose mixtures, taste/flavour suppression 505
Canine lingual epithelium
sweet taste, transport pathways 1
Cell dynamics
mouse olfactory epithelium—morphometric analysis 741
Cell maturation
mouse olfactory epithelium—morphometric analysis 741
Chemosensory processes
degradative enzymes 181
Child—dog interaction
experimental analysis, olfactory cues 679
Citric acid
sucrose mixtures, sensory integration 87
Coffee
interactions—sucrose mixtures, taste/flavour suppression 505
Contingent negative variation
odor/cognitive alteration 537
Cyclic AMP
affects, amino acid—olfactory cilia 419

Degradative enzymes
chemosensory processes 181

Electrical taste stimulus
current intensity/density? 341
Electrophysical responses
male hamster olfactory receptor neurons—female pheromones components 725

Fischer-344 rat
genetic transmission—NaCl aversion 521

Frog
olfactory system, temporal aspects—information processing, stimulus intensity 349
Fungiform papillae
quantification, humans 281

G_9
distribution—olfactory neuroepithelium 333
G_{olf}
distribution—olfactory neuroepithelium 333
Gustatory cortex
hamster, optical activity recording, tongue electrical stimulation 137
Gustatory perception
isohumulones—influence sex/thiourea taster status 485

Hamster
tongue electrical stimulation, gustatory cortex optical activity recording 137
Honey bee
odorant moiety, odor mixture perception 111
Humans
odor, response, automated measurement 165
quantification, fungiform papillae/taste pores 281
taste stimuli, after taste studies 271

Information processing
temporal aspects, frog olfactory system, stimulus intensity 349
Insects
odorant-binding protein, similarities/common function, vertebrates 205
Isohumulones
gustatory perception—influence sex/thiourea taster status 485

Labeller lobe
feeding response, *Protophormia terraenovae* 145
Lobster
receptor potential, olfactory receptor cells 397

Mediodorsal thalamic nucleus
acquisition—olfactory learning-set, rats—lesion size 713
Mice
olfactory epithelium, cell dynamics/cell maturation—morphometric analysis 741
SOA tasting, major gene influence 243
Molal concentrations
psychophysical investigation—Beidlers mixture equation 659

Morphometric method
estimation—olfactory glomeruli 407
Moth
olfaction, peripheral events 191

NaCl aversion
Fischer-344 rat, genetic transmission 521
NaCl concentration
effects, eating/drinking patterns, rats 295
Nasal epithelium
vertebrate odorant-binding protein transportation 217
Nasal trigeminal
responses–toluene, automated delivery system 701
Nerve recording
SAPID tools programs 253
Neuroepithelium
olfactory, distribution, G_9/G_{olf} 333
Nostril
left/right ability, binasal olfaction 233

Odor
alteration—contingent negative variation 537
human response, automated measurement 165
mixture perception, odorant moiety, honey bee 111
Odor complexity
note 491
Odor similarity
assessment triadic comparison/sorting 691
Odorant-binding protein
transportation, vertebrate nasal epithelium 217
vertebrates/insects, similarities/common function 205
Olfaction
left/right nostril, binasal ability 233
non-traditional 'taste' stimuli, perception 755
peripheral events, moth 191
Olfactory
learning-set acquisition, lesion size mediodorsal thalamic nucleus, rats 713
Olfactory cilia
affects, amino acid—cyclic AMP 419
Olfactory cues
experimental analysis, child—dog interaction 679
Olfactory glomeruli
estimation—morphometric method 407
Olfactory mucosa
vertebrate regulatory factors 223
Oral astringency
exposure/interaction, sweetners 151

Phenylthiocarbamide
age/sex effects, sensitivity 39
polymorphism, genetic studies 27
Pigeons
reversal learning, visual/olfactory discrimination 59
Potassium
transport pathways, taste transduction 129
Protophormia terraenovae
labeller lobe, feeding response 145
Pyridoxal 5′-phosphate
probe, structure—activity study thaumatin 457

Rats
NaCl concentration—eating/drinking patterns 295
Receptor neurons
pheromones/host plant odors, *Anthonomous grandis* 311
Receptor potential
olfactory receptor cells, lobster 397
Regulatory factors
vertebrate olfactory mucosa 223
Reversal learning
visual/olfactory discrimination, pigeons 59

Saguinus fuscicollis
scent marks components, proteins 431
SAPID tools
programs—analysis, nerve recording 253
Scent marks
components, proteins, *Saguinus fuscicollis* 431
Sensing studies
sucrose—maltol mixtures 447
Sensory integration
sucrose/citric acid mixtures 87
SOA tasting
major gene influence, mice 243
Sodium salts
taste detection thresholds—young/elderly humans:correlation–anion molar conductivity 671
Sodium
transport pathways, taste transduction 129
Sucrose
citric acid mixtures, sensory integration 87
sweetness magnitude/differences, multiple pscychological scales 75
Sucrose—maltol mixtures
sensing studies 447
Sucrose mixtures
interactions—caffeine/coffee, taste/flavour suppression 505
Sucrose stimulation
sweet taste inhibitor, inhibits—chorda tympani nerve/adenylate cyclase—anterior lingual membrane, rats 529

'suppression' concept
taste synthesis implications 495
Sweet taste inhibitor
inhibits sucrose stimulation—chorda tympani nerve/adenylate cyclase—anterior lingual membrane, rats 529
Sweetners
exposure/interaction, oral astringency 151
Sweetness magnitude
sucrose multiple pscychological scales 75

Taste
sweet, canine lingual epithelium transport pathways 1
transduction, sodium/potassium transport pathways 129
Taste detection thresholds
sodium salts—young/elderly humans:correlation—anion molar conductivity 671
Taste pores
quantification, humans 281
Taste stimuli
after taste studies, humans 271
electrical, current intensity/density 341
non-traditional, olfaction—perception 755
Taste synthesis
implications—neural coding
theories/'suppression' concept 495
Thaumatin
structure—activity study, pyridoxal 5'-phosphate probe 457
Time—intensity curves
averaging methods 471
Toluene
nasal trigeminal responses, automated delivery system 701
Tongue
hamster, electrical stimulation, gustatory cortex optical activity recording 137
Triadic comparison
odor similarity assessment 691

Vertebrates
nasal epithelium, odorant-binding protein transportation 217
odorant-binding protein, similarities/common function, insects 205
regulatory factors, olfactory mucosa 223
